#### **DETAILED ACTION**

## Response to Arguments

1. Applicant's arguments, filed 8/5/05, with respect to the rejection(s) of claim(s) 1-7 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of previously cited prior art.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Ueyama (5,204,629) (previously cited on PTO 892 Paper No. 20050509). Ueyama discloses a patient bed mechanism for a magnetic resonance imaging system adapted to receive a subject, movable into and out of the examination space, a coupling unit for coupling a gradient coil unit to the bed mechanism, where the bed mechanism moves toward the gradient coil and releasing the coil unit from the patient bed when the bed again moves in the movement direction (abstract, col. 3 lines 15-50, col. 4 lines 53-68). Ueyama further teaches said system to comprise a cart for receiving the coil unit with connection of the cart to the sensor (col. 5 lines 3-12). The system further includes a guide or

Application/Control Number: 10/611,456

Art Unit: 3737

control device to guide the gradient coil unit through the examination space (col. 5 lines 25-40, col. 6 lines 15-44).

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Baisakhi Roy whose telephone number is 571-272-7139. The examiner can normally be reached on M-F (7:30 a.m. - 4p.m.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian L. Casler can be reached on 571-272-4956. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
